

# Council of Europe - Preventing and Combating Sexism

## **CHAPTER I: Understanding Sexism**

### **Article 1: Definition**

Sexism is any act, gesture, visual representation, spoken or written words, practice, or behaviour based upon the idea that a person or a group of persons is inferior because of their sex.

## **CHAPTER II: Areas of Implementation**

### **Section 1: Media, Internet, and Artificial Intelligence**

Measures must be taken to prevent sexist language and the objectification of women in the media and online. AI and algorithmic decision-making must not reproduce or exacerbate gender stereotypes and sexism.

### **Article 2: Sexual Harassment**

Sexual harassment is a form of gender-based violence and extreme sexism. AI systems that generate derogatory, sexualized, or harassing content targeting individuals based on their sex violate human dignity.
