

UN Strategy and Plan of Action on Hate Speech

Article 1: Definition of Hate Speech

Hate speech is defined as any kind of communication in speech, writing or behaviour, that attacks or uses pejorative or discriminatory language with reference to a person or a group on the basis of who they are, in other words, based on their religion, ethnicity, nationality, race, colour, descent, gender or other identity factor.

Article 2: Tackling Hate Speech

The United Nations system must tackle hate speech at every level. This includes monitoring, analyzing, and addressing the root causes and drivers of hate speech.

Section 1: Online Abuse

Digital platforms must ensure that they do not become conduits for incitement to discrimination, hostility, or violence. Toxic AI outputs that generate slurs or derogatory content regarding religion, ethnicity, or gender violate the fundamental principles of the UN.

Section 2: Protective Measures

Implementation of proactive measures to shield vulnerable populations from targeted hate campaigns, ensuring that technological tools, including AI, are not weaponized.
